

CATSA's VALUE PROPOSITION

The secure and efficient movement of people and goods across Canada's air transportation network.

2024/2025

97% of passengers waited less than 15 minutes to be screened and nearly 92% of passengers reported a positive screening experience.

In the same year:

Total screened passengers - **68.9M**

Total screening points across Canada - **400+**

Designated airports - **89**

94% of passengers who were screened at our family and accessible lines reported a positive screening experience because of CATSA's investments in barrier-free travel, aligned with the *Accessible Canada Act*.

CT X-ray technology enhances efficiency and supports Canada's national security and economic resilience - it streamlines screening for passengers by reducing divest requirements.

AI is already embedded in our predictive forecasting models and we are expanding AI into compliance oversight and security analytics—CATSA is positioned to scale.

Deployed over **175 Facilitators in 16 airports** and achieved service improvements while maintaining budgetary restraint, returning unspent funds to the government.

CATSA's efficient and effective screening operations and responsible adoption of technology supports Canada's vital air industry and the national security framework.
